Standard on every Premier Liner.

The strongest seams you'll never see! Over 500,000 installs!

Be Smart, Play it Safe

IMPORTANT: A number of very important items that are essential for the safe use of your pool may not be visible in many of the photographs, either because of perspective or camera angle, or because they were removed for photographic purposes. These items include:

- 1. Safety ropes, which should remain in place at all times
- 2. “No Diving” signs are provided by the manufacturer and should be installed in accordance with instructions included on the coping or liner, where they are clearly visible
- 3. An area sign is provided by the manufacturer and must be permanently and conspicuously affixed in the pool area where all users can see it
- 4. Necessary means of exit and entry into the pool
- 5. Fencing with a self-latching gate, and other barriers that can assist in preventing unsupervised access to the pool by children
- 6. Approved drain covers and other devices to protect against suction entrapment.
- 7. Minimum required inlets and returns to ensure proper water circulation
- 8. Appropriate in pool lighting if the pool will be used after dark.

All of these devices should be installed in accordance with the manufacturer’s instructions, ANSI/NSPI or ANSI/APSP standards, as well as state and local statutes and codes.

Diving boards and slides require minimum depths and distances and must only be installed and used in strict compliance with the equipment manufacturer’s specifications and ANSI/NSPI or ANSI/APSP standards.

If the pool is labeled by us as NON-DIVING, then diving equipment may not be installed and any such equipment must be removed before the pool is used.

Smart pool owners always think safety first. They take specific steps to ensure that their family, friends and guests are knowledgeable about the safe and sensible use of their pool. They also:

- ensure that their pool is never used unless there is adequate supervision
- ensure that their pool is kept in good repair and is not used when there is a missing or broken drain cover or other component

- ensure that ALL CHILDREN using their pool are supervised constantly
- that anyone under the influence of alcohol, drugs or stimulants that would impair their abilities or judgement does not use the pool
- ensure that their pool is protected by appropriate barriers to unsupervised entry including fencing with self-latching gates,v covers, alarms, etc.

To assist you, a number of very important items of safety literature are included with each pool. We must insist that you read each item carefully and follow the instructions. These are:

- Pool Ovwners Safety Handbook
- “Notice” Card
- APSP “Sensible Way” Book
- Vinyl Swimming Pool Liner–Warranty
- “Children Aren’t Waterproof” Book
- “No Diving” Labels
- Plaque

Make sure your builder supplies you with all of the safety information that accompanies your pool and installs the enclosed warning stickers and area sign where they can be clearly visible to all who use the pool.
